Towards sustainability for all

TrashIt helps you make sustainable choices everyday!
From waste collection to its proper disposal, we have
got you covered.

*In last 8 months, we saved over **100,000** kgs of waste from ending up in landfills

trash t

2. This input is then taken to our urban facility.

3. Waste is processed at our urban facility using a natural composting process, & Recyclables are sourced to recycling industry.

How it works!

1. Source separated waste is collected from offices.

4. Compost is used by community to support local food system.

Organic Waste Diverted Quaterly

**This is where your waste ends up EVERYDAY...
It rots here producing greenhouse gases,
groundwater contamination and diseases**

ARE YOU SATISFIED KNOWING THIS IS THE IMPACT OF YOUR
